There are several points to note before traveling to Greece:

1. It is imperative that travelers first need to consult their attending doctors to assess their fitness for travel.
2. Advanced booking of dialysis appointments with Euromedica Rhodes is necessary
3. To facilitate communication, our Dialysis Center will send the traveler form or it can be downloaded from our home page in different languages.
4. The patient would need to fill out the traveler form and send back for our medical evaluation
5. After our Nephrologists have evaluated the medical status on the traveler form and requested documents for us, we will confirm and assign appointments for the duration of your stay on Rhodes.
6. Wishing you Safe travel, see you in Rhodes!

Our services:

- Offer Wi-Fi facility
- TV with international Channels
- Magazines & Newspaper
- Free pick up and drop off from our Partner Hotels within a package booking
- Diet consulting
- Catering from our Cafeteria (with extra charge)
- Rehabilitation activities (with extra charge)
- Specialized Checkups (with extra charge)
- Supportive education for the patient's family members

We offer a convenient location in the heart of Rhodes (Between Rhodes – Lindos) with a max. transfer time of 60min from any hotel.

Those patients who are stable on dialysis can travel to other countries, for business, family reunions or sight-seeing. We encourage tourist dialysis as it significantly improves the quality of life for the patients. Therefore with our new established Dialysis Center in Euromedica, Rhodes is now a destination with the latest Dialysis Technology and Clinic Facilities available that can serve dialysis patients during their vacation on the Island. In keeping with our philosophy of convenience, compassion and comfort, the Euromedica Dialysis Center offers an empathetic environment with the best facilities. Our Renal Care also has a separate arrangement for Hep-B and Hep-C positive patients who are undergoing dialysis treatment. For Patients that wish to enjoy their own privacy, they can book the VIP single Dialysis centre for their treatment. Patients can undergo treatment without getting hospitalized, making them feel relaxed.

We also provide Pre and Post treatment care and most importantly 24/7 medical assistance along with state of the art emergency facilities.

Technical Details:

Our dialysis centre uses 17 Gambro artis physio dialysis machines, all with a 5 year guarantee. The water sterilization mechanism, with reverse osmosis, was designed by Temak. This consists of two individual membrane systems, pumps and softeners, to remove the risk of breaks and delays in the centre operation. The centre has its own 65kva generator.

We accept EHIC for visitors from Europe.
